

PIXEL HERTZ as EAW exclusive Dealer

HONG KONG: PIXEL HERTZ Co., Ltd is now handling distribution for EAW's products, interfacing with Sanacore Group, for the Hong Kong and Macau SAR regions. The service will include sales and support, service and technology, marketing etc.

"PIXEL HERTZ specializes in pro audio product distribution and its purely

product distribution position keeps it at a neutral role selling and marketing EAW products in different projects. We are excited to have PIXEL HERTZ exercise their top-tier position in the region's marketplace and act as a key partner of Sanacore Group's distribution team in Greater China," stated Alan Ho. "With several new and innovative EAW products hitting the market this year,

we look forward to utilizing Pixel Hertz 's expertise in pro audio market to enhance and expand EAW's presence in the region."

Sindo Exports brings pristine KV2 Audio experience

SINGAPORE: Sindo Exports, the authorized distributor for KV2 Audio in Singapore and Malaysia, recently held a speaker demonstration for the brand at the Singapore Polytechnic Convention Centre.

The event unveiled KV2's latest VHD series and the K-RIG range to an intimate crowd, where systems integrators, engineers and more gathered to experience the robust system live and in person.

Forming the heart of the demo session were one VHD 2.0 module hung above the stage, with a VHD 1.0 mid high cabinet serving as down-fill, both driven by a VHD 2000 amplifier. Reinforcing this were 4 x VHD 4.18 active driven sub-woofer systems powered by the VHD 3200 amplifier.

The VHD have been designed to revolutionize the concert sound market by offering unparalleled quality, power and coverage, with huge cost savings in terms of size,

weight, transportation, storage and set up time. VHD can be flown in minutes with its simple proprietary fly system which locks into the handles on each cabinet. Various hang points and an easily adjusted chain provides tilt as required.

Also in the limelight were the newly launched K-RIG series.

Placed in a ground stack setup, the K-RIG consists of the KT2.0 fully-horn loaded mid/high module, KT2.15 sub bass cabinet and the K-PAK 2600 proprietary amplification and control system. It is fully active with three amplifiers in the K-PAK driving the bass, mids and highs. This allows for optimal control, protection and output from each of the system components which is ideal for small to medium production market and DJ sector.

An additional ESD15, rigged on a tripod and driven by an ESP2000, was deployed as full range without sub-woofers.

Attendees were encouraged to move freely throughout the venue to experience the KV2 system's highly specific and precise coverage patterns through a playback of contrasting tracks selected by the Sindo team to highlight the system's range.

New Distributor Named for Audient

Audient's Simon Blackwood flanked by COO Lenlo Zhu (left) and CEO KK Chen (right)

CHINA: British manufacturer Audient has appointed Digime as the new distributor for its compact product range, including the USB interface, iD22 and the 8-channel mic pre and ADC, ASP880.

Audient's Simon Blackwood confirmed, "Digime has built a strong presence in the pro audio market and is uniquely positioned to connect directly with our rapidly growing customer base in China. We couldn't be happier with the new partnership."

Fresh and fully energised after the recent PALM Expo 2014 in Beijing, Digime's COO

Lenlo Zhu and his team were encouraged by the visitor response to the Audient range. Lenlo says of the iD22, "It's simply fantastic! It has that traditional, classic Audient console sound, with a British design style. A monitor, mixer and mic pre-amp all combined in one unit – it's a best buy!"

China distributor HX Audio will continue to look after Audient's console sales in the Hong Kong and Chinese territories.
